Subject: Letter of Recommendation for David Worsley-Tonks

To whom it may concern,

It is with great pleasure that I recommend David Worsley-Tonks for any professional opportunity in the field of software development. I had the opportunity to work closely with David at JETPULP from 2015 to 2018, during which time he proved to be a key contributor to the success of numerous complex projects.

One of David's most remarkable qualities is his exceptional ability to adapt. Whether it involved quickly adopting new technologies, responding to constantly evolving client requirements, or navigating diverse technical and organizational environments, David consistently rose to the challenge. His curiosity and rapid learning ability allow him to stay up to date with innovations in the field while delivering practical, creative solutions to the problems encountered.

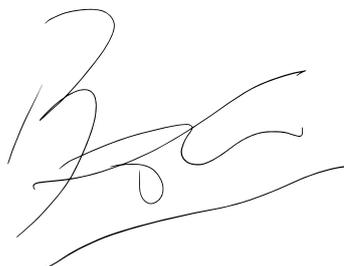

During our collaboration, David stood out for his strong command of both front-end and back-end technologies, particularly PHP, Symfony, WordPress, and Vue.js. He played a critical role in several strategic projects such as CRIDON, Credixia, and Clavel Assurances, always ensuring deadlines were met and quality standards upheld. His ability to work efficiently within a team and collaborate with a wide range of stakeholders is another strength that clearly sets him apart.

Beyond his technical skills, David demonstrates exemplary rigor and professionalism. Always available and eager to take on new challenges, he inspired confidence among both colleagues and clients through his commitment and strong sense of responsibility.

In summary, I am confident that David would be a valuable asset to any organization fortunate enough to work with him. I highly recommend his application and remain at your disposal should you require any additional information.

Yours sincerely,

Alix Baillet
